

# NEXT GENERATION CONTRACTORS

## Polaris - First Aid & Site Access

A solid workforce on rail maintenance jobsites, the 4Tonne Dump Truck can climb ballast to access tracks, providing site access in narrow environments for fire hazard reduction, ballast distribution, and equipment transport along track.

### Key Features

#### Site Ready Tyres

Heavy Duty Jobsite tyres for off-road access and speed limited for jobsite compliance

#### Sturdy

Kevlar Backed Vinyl Seats with Hi-vis seatbelts and decals

#### Carry Capacity

884kg  
6 person carry with individual seatbelts and rear cargo

#### First Aid Support

On board emergency retrieval kit with stretcher and first aid

Our Polaris Site Access Vehicle is perfect for transporting people to and from site in difficult to access rail corridors. The onboard first aid emergency response kit provides retrieval and support options in emergency situations.
