# RP M450 MV ELEVATED WORK PLATFORM

The 450MV sets a new standard with enhanced precision, increased lift capacity, and 360-degree cameras for incident investigation and operator training. Its auto-off standby mode improves fuel efficiency and reduces emissions, making it ideal for tunnels, bridges, and enclosed spaces.

## The Ultimate Rail MEWP

### Stage 5 Emissions Compliant

Low emission diesel technology with Ultra-low NOx and particle matter emissions, improving air quality in tunnels, urban worksites, and enclosed spaces.

### Auto-Off Efficiency

Our EWP automatically switches to standby after a set time, reducing noise, emissions, and fuel consumption, making it ideal for tunnels, bridges, and enclosed worksites.

### 450kg Basket

Largest Basket Capacity in Its Class Upgraded to 450kg (from 400kg) for greater efficiency and versatility.

### 360° Operation and Vision

Full visibility cameras with recording for incident review & operator training. Boom works in all directions, even with a pantograph fitted.
